### PROJECTS

**Blog Platform:** Create a full-stack, server-side-rendered, web application. Front-end portion built using HTML, Thymeleaf and CSS while using no frameworks or JavaScript. Back-end portion built using Spring Boot and the following dependencies: DevTools, Web, Thymeleaf, JPA, H2 and proper TDD.

**Review Site:** Create a Review site which gives the user ability to view reviews, organize reviews into categories, create and update their own reviews, create hashtags for their reviews and view all reviews associated with a specific hashtag. Main tech used: Spring Boot, MVC & Server Side Rendering, Advanced TDD, Thymeleaf, JPA, and H2.

**Cookie Clicker:** Design a dynamic website game based off of the original Cookie Clicker. Main tech used: Vanilla JavaScript, CSS, HTML, and Jasmine TDD.

All projects utilized Git-hub and Git-Bash to ensure proper industry standards for project organization, sprint planning, quality-assurance techniques, source control and communication.
