PROJECTS

Food Truck Review Site — *Java, IntelliJ IDEA CE, Spring, Thymeleaf, Visual Studio Code, Git, GitBash, TDD, OOP*

- Created a web application to review local food trucks
- Designed ability for users to read, interact, and post their own truck reviews

Donut Clicker — *Javascript, Visual Studio code, Spring, Git, Github, Gitbash*

- Utilized knowledge of Javascript, Spring, HTML/CSS to build a game that is a tribute to Cookie Clicker with a pop culture spin
- Allows users to make golden donuts and spend donuts to buy auto clickers and multipliers

Album Review Site — *Javascript, SPA, Java, JSON, Visual Studio Code, IntelliJ IDEA, Spring, Git, Github, Gitbash*

- Collaborated in scrum team to design an album review single page application utilizing Kanban boards and working in branches
- Permits users to rate albums, edit album names, and make new albums

Reflect App — *Javascript, SPA, Java, JSON, Visual Studio Code, IntelliJ IDEA, Spring, API, MVC*

- Worked in a team using sprints to build an application applying Github's project tables while making frequent commits
- Promoting meditation and self-reflection in a mobile app

PROFESSIONAL EXPERIENCE

Piezosurgery Inc. A Mectron Company, Columbus, Ohio (October 2016 - January 2022) *Technical Services Specialist*

- Generated and processed RMAs using Salesforce, Excel, Google Drive, and Adobe
- Applied logical thinking while creating a sequence of operations for workflow and repairs
- Formed a service department with a new source of revenue and trained employees

Airmax Heating and Cooling, Reynoldsburg, Ohio (June 2012 - September 2016) *Lead Service Technician*

- Troubleshooted issues, quoted customers for repairs, and serviced furnaces, air conditioners, boilers, and refrigeration integrated systems (ice makers and restaurant equipment) for both commercial and residential
- Mapped out service plans with clients to repair their equipment
- Displayed flexibility after-hours for emergency service covering central Ohio
- Trained new service Technicians
