SOFTWARE DEVELOPMENT EXPERIENCE/PROJECTS <https://github.com/BrianMunsey?tab=repositories>

We Can Code IT, Columbus, OH
Software Development Student, 2022

Virtual Pet Shelter: Designed console application that lets users create and interact with their own virtual pets.

- A project utilizing classes and abstract classes to make pets.
- Utilizing methods to interact with one or all pets, as well as creating new pets.

Java, Visual Studio, Git, Github, GitBash, TDD, OOP

Jukebox Heroes: Designed a single page application using a personalized API to review Albums and their songs.

- A group project utilizing Spring Framework to create a single page, fullstack application that utilizes
- Javascript functions to display album reviews as well as associated individual song ratings.
- Users use calls to the backend mapping to rate, review, edit, add, and delete songs and albums using SQL commands to the database.

Java, Visual Studio, Git, Github, GitBash, TDD, OOP, Spring Web, Spring Boot Devtools, Spring Data JPA, H2 Database

Iorganize: Designed a single page application using a personalized API to organize your projects and inventory of either your household or small business.

- On the frontend we utilized controllers and fetch requests to manipulate the View of the data to dynamically create a single page application using javascript.
- On the backend we utilized MVC Framework to build POJOs, controllers, and a Populator to create and manipulate the View based on user input.

Java, Visual Studio, Git, Github, GitBash, TDD, OOP, Spring Web, Spring Boot Devtools, Spring Data JPA, H2 Database
