## SOFTWARE DEVELOPMENT EXPERIENCE/PROJECTS

---

<https://github.com/hersonsosa>

We Can Code IT, Columbus, OH  
Full Stack Java Software Development Student, 2022

**iOrganize:** Designed and developed a single-page application using JavaScript, Spring Web framework and H2 Database to store user information for the purpose of creating a capable Personal Inventory Management System. System allows users to create a categorized, layered inventory with set relationships, attributes and images. Used the primary HTTP methods to allow user customization. Project applied successful Agile development methodologies and the SCRUM process framework using Jira.

**Tech Stack:** JAVA, Visual Studio, Git, Github, GitBash, TDD, OOP, REST, JavaScript

**Sound 4 Digital:** Developed an application to keep track of a record collection and access music by albums or individual tracks. Allowed users to be able to update the collection and its elements. Users were also given the ability to create, delete and retrieve all the information using the HTTP request methods. Created a RESTful API with Spring Boot and a responsive single-page application using modular JavaScript.

**Tech Stack:** JAVA, Visual Studio, Git, Github, GitBash, TDD, OOP, THYMELEAF, SPRINGBOOT, MVC, H2

**Alpha-Three:** Developed a multi-page Console Review Web-App utilizing Spring Web Model View Controllers. Allowed users to be able to comment and add tags to Consoles and an index for finding elements tied to user tags. Front-End was created with a friendly user interface and user experience in mind. Information was stored using the H2 database using CRUD interface conventions.

**Tech Stack:** JAVA, Visual Studio, Git, Github, GitBash, OOP, SpringBoot, MVC, HTML, CSS, H2, CRUD

## PROFESSIONAL EXPERIENCE

---

### Cardinal Health, Groveport, OH (FEB, 2017 to OCT, 2021)

#### Logistics Coordinator

- Managed daily executions of shipments from the National Logistics Center to internal Distribution centers resulting in a 98% on time delivery metric.
- Admitted and released shipments and returns in and out of the facility in coordination with up to 7 different carriers and vendors from across the country.
- Maintained paperwork and Systems associated with arrivals and departures and documented logistics data for the business and network partners using Oracle and Office Enterprise technologies.
- Identified opportunities to improve efficiency through lean process and sigma principles resulting in a faster turnaround for deliveries and in increase in production.

### United States Marine Corps, Jacksonville, NC (AUG, 2012 to AUG, 2016)

#### Supply and Administration Specialist

- Performed and monitored the management and procedural application of inventory control actions using Oracle based software and Consolidated Memorandum Receipts produced from a database.
- Created reporting and accounting documentation for gain/loss transactions, consolidated memorandum receipts and all unit inventory with the highest administrative and physical accuracy resulting in low case Audits.
- Handled maintenance customers effectively by identifying needs, quickly gaining trust, approaching complex situations in an understanding manner, and obtaining solutions to maximize unit readiness.
- Executed and monitored supply chain activities with the objective of leveraging worldwide logistics, synchronizing supply with demand, measuring performance using established metrics and facilitating accountability in retail and intermediate inventory, activities and other Marine Corps units.

## EDUCATION & TRAINING

---

We Can Code IT | Certificate of Software Development, 2022

Stonewall Jackson High School | High School Diploma 2012
