<https://github.com/Jessicawyt>

Software developer with an aptitude for problem solving. Experienced collaborator with a demonstrated history of working within a diverse team. Lifelong learner with a passion for personal growth. Looking to break into a career in software development in a company that values ongoing education.

## Software Development Experience

### Donut Maker

A game inspired by “Cookie Clicker” that allows users to acquire donuts by clicking a button and unlock achievements with required donut counts. The project was built with [vanilla JavaScript](#) for frontend and [.Net Entity Framework Core API](#) in C# for the data of certain challenges. [CSS Animation](#) is a core component of the project that is dynamically implemented by Javascript.

### Album Collection

A [full stack single-page application](#) that displays a collection of albums as well as the artists, songs and reviews related. The users have the options to read/add/edit/delete a single album or artist. The project cooperates [node.js](#) for manipulating data from a [RESTful API](#) built with .Net Entity Framework Core in C#.

### Restaurant Review Site

A [collaborative](#) web application utilizing .Net Entity Framework Core [MVC](#). The application was developed following [Scrum](#) methodology as well as using [git](#) workflow.

### Blog It

A web application allowing users to keep a record of their posts based on categories. The project utilized the [MVC](#) design pattern and displays categories and posts which were pre-populated from [SQL Server](#) database based on the models. The controllers implemented CRUD operations so that users could read/add/edit/delete any posts or categories. Views created with Razor syntax are dynamically changed with user interactions.

## Education & Training

Spring, 2021

### We Can Code IT

Certificate of Software Development

2012 - 2015

### China University of Geosciences

Bachelor of English

## Professional Experience
