Projects

iOraganize Inventory Management - *MVC, GitBash, GitHub, Intellij, JavaScript, API, Spring, CSS, Java*

- Group Final Project, single page application for inventory management. For home use or small business users are able to creat storage, within that they can create categories and store items within the category.

- I filled out the populator for the whole project, allowing data to show on the application.

- We went a very modern design on the frontend side ustilzing some javaScript, CSS, and FlexBox. Keeping the application clean and very user friendly.

- For the Backend we implemented MVC, JavaScript abilities to minpulate the DOM to the creat a single page application.

Album Review Site - *Javascript, Java, Visual Studio, IntelliJ IDEA, Spring, Git, Github, Gitbash, API*

- Group Project for an single page application, that display albums and songs within the albums, allowing users to input rating and comments.

- I created the controller to map the albums and songs.

- Frontend side we ultilized CSS and Flexbox to stlye and design the layout.

- Backend we utilized spring, javascript functions to display albums reviews and song ratings. When users review, add, delete, or rate songs and albums SQL commands are use to the database.

Donut Maker - *JavaScript Application*

- A simple in-browser game that's inspired by an old "Cookie-Clicker"game.

- Players click on buttons to make donuts and buy upgrades andmultipliers for their donut-making. Built with HTML/CSS/JavaScript

- This project helped me understand JavaScript functionality and the core base of JavaScript.
